

When can marketers expect to receive distributions, particularly in connection with Power Keys and Golden Power Keys? What returns are currently realistic?

- *Since the Marketers are part of Lyconet network and due to active NDA and privacy rules, please contact Lyconet office to reply on this question.*
- Were the current @media License Packs and their terms and conditions agreed with you in advance? When can commissions be expected?
  - *These are the same packs that Lyconet was selling to its marketers. In Q4 of this year (maybe earlier), we will make changes to the packages as well. Commissions are being paid by Lyconet to Marketers, so I would know to tell you.*
- What has happened to the money that marketers have paid into the Mediabox project? Is the money still with Lyconet/myWorld or already with ATMEDIA Europe Ltd.?
  - *We don't have any funds received from Lyconet/MyWorld.*
- Are existing contracts or claims of marketers against Lyconet/myWorld still valid, or do new agreements have to be concluded with ATMEDIA Europe Ltd.?
  - *Marketers have active contracts with Lyconet/myWorld, we provide service for Lyconet/MyWorld and they offer to their clients. ATMEDIA is not and never will be a company in the MLM industry.*
- Do marketers have legally binding claims against ATMEDIA Europe Ltd. for their previous investments?
  - *No. Marketers never invested in ATMEDIA Europe Ltd.. We are not and never will be investment fond.*
- Why has the change of ownership not yet been communicated publicly or through official channels? Is more transparency planned for the future?
  - *I believe that MyWorld/Lyconet already announced it. Anyway, I have made numerous live tours and online tours for the exact purpose, to announce the change of ownership, what was happening in the past, where we are now and where we are going in the future. Transparency is my imperative.*
- Are all rights to the software, hardware and concept now fully owned by ATMEDIA Europe Ltd.?
  - *Yes.*
- Why was the Mediabox repeatedly presented as ready for market when it was clearly never finished? Are there new timelines for the rollout?
  - *I have no idea why, you will need to check with previous management of the project. Regarding our roadmap, we have a detailed plan, with exact timelines.*
- Who takes responsibility for previous statements about a supposedly functioning product?
  - *The ones that were giving the statements.*
